

## Targets for Climate and Environment Charter

### Target 1: All projects demonstrate environmental awareness

#### Planned actions:

- Finalise indicators on environmental awareness within the revised Safe, Accessible, Dignified, and Inclusive (SADI) Framework
- Ensure all SADI-eligible projects are assessed against internal quality standards using the revised SADI Framework
- Analyse SADI baseline data on environmental awareness to inform training and sensitisation

### Target 2: Environmental Stewardship Tool (EST) is rolled out with selected partners and projects

#### Planned actions:

- Determine and agree criteria for application of the EST, such as the level of environmental risk and the degree of interface with the environment
- Train partners that manage identified projects on the application of the EST
- Track assessment of selected projects and incorporation of mitigation measures in project proposals and implementation plans

### Target 3: EST is applied to new humanitarian projects in priority countries and sectors

#### Planned actions:

- Develop a standardised humanitarian project proposal template which prompts partners to consider environmental risks and mitigations
- Build Emergency Response and Support Team (ERST) and programme teams' capacity in using EST through trainings and refreshers
- Ensure application of EST to all new humanitarian projects in priority countries/sectors

### Target 4: CAFOD remains below 50% of its pre-Covid level flights (using 2019/20 as a baseline of 850 flights) from 2022/23

#### Planned actions:

- Provide first full and accurate annual picture of number of CAFOD flights for 2022/23
- Accurately report on the carbon footprint of international air travel
- Review flight planning process used for 2022/23 and integrate flight planning into annual planning processes for 2023/24
