

and Environment Charter for Humanitarian Organizations.

The spirit and message of Climate Charter, set direction for us at Nile Sustainable Development Organization (further NSDO NNGO) in the two years (2023-2025 years to be renewed). The NSDO has outlined action plan for measurable targets to attain our commitments under International Climate and Environment Charter for Humanitarian Organizations in South Sudan context in nexus of humanitarian, peace and development.

The objectives for the following commitments will be brought in over the time period from 2023 to 2025 years.

In order to conduct our activities and impact monitoring, reporting, evaluation and learning for the progress of the targets set by us at NSDO NNGO, we will further establish baseline indicators, and report in comparable and measurable manner on a minimum annual basis to Climate Charter Team at International Federation of Red Cross (IFRC).

Objectives	The NSDO's Targets (June 2023 – June 2025)	Planned actions	Target date
Objective 1 Step up our response to growing humanitarian needs and help people adapt to the impacts of the climate and environmental crises	Target 1 a) All NSDO's staff and our on ground volunteers, community mobilisers, project facilitators, and communities' groups and committees where we work through our projects demonstrate environmental awareness and commitments to implement it in action.	→ NSDO will organize and conduct educational activities for orientation, sensitisations.	June 2023, With end year review
	Target 1 b) Environmental and climate considerations are integrated into all our actions	<ul style="list-style-type: none"> → Contextualise projects given the environmental vulnerabilities in the areas where the NSDO's projects are located. → Assess projects for potential negative environmental impacts, given the context, and mitigation. → Enhance environmental benefits in the projects. → Periodic environmental situation analysis for efficient and sustainable response, coordination, collaboration, advocacy, preparedness planning, capacity building of communities for resilience. 	June 2023, With end year review
	Target 1c): Locally led / Community based adaptation and resilience building	<ul style="list-style-type: none"> → Conduct Community Adaptation Planning for learning and flexible plans setting with communities to reduce their vulnerability to climate change over time. → Conduct Climate vulnerability and capacity analysis go gather, analyse and feed into action information on community level vulnerabilities and capacities for climate change. 	June 2023, With end year review
Objective 2: Maximise the environmental sustainability of our work and rapidly reduce our greenhouse gas emissions	Target 2a) Improve NSDO's knowledge of, raise public and partners' awareness of, minimise gas emissions and mitigate human made /generated effects of climate change (e.g. charcoal, cutting wood, etc)	<ul style="list-style-type: none"> → By the end of 2023, our projects, activities and services provided by NSDO in South Sudan will include environmental sustainability considerations under and through MEAL → In 2023 the NSDO will develop, publish and implement organizational Environment Protection Policy and Strategy with impact and evaluation measuring tools/indicators in compliance with international and South Sudan national Environment and Climate protection standards. 	June 2023, With end year review

		<ul style="list-style-type: none"> → Purchase goods and services that have the least negative impact on the environment and by focusing on the sustainability of a product's production, transport, and waste disposal. → Build and invest in the knowledge and capacity of staff to deliver this commitment. 	
Objective 3: Embrace the leadership of local actors and communities	<p>Target 3 a) Improved climate smart, environment and climate sensitive, environment friendly practices, knowledge and attitudes within grass root communities.</p> <p>Target 3 b) Better implementation of respective legal provisions protecting Environment from pollution, degradation, deforestation</p>	<ul style="list-style-type: none"> → Awareness raising campaigns on environmental sustainability and climate change mitigation in grass root communities through people's participation all levels; → Number of grass root Climate Activists trained; → Number of grass root climate and environmental action groups capacitated through trainings; → Number of meetings with respective authorities as part of advocacy 	June 2023, With end year review
Objective 4: Work collaboratively across nexus humanitarian, peace and development actors in formal and informal sectors to strengthen climate and environmental action.	<p>Target 4 a): Explore and work collaboratively with actors in South Sudan and beyond from multiple sectors, including respective governmental institutions, civil society, alliances, networks, working groups , etc to use networking and partnership to catalyse and more ambitious, sustainable climate action and environmental protection in South Sudan to mitigate climate change effects and environmental degradation.</p>	<ul style="list-style-type: none"> → Measurable advocacy activities that NSDO engaged in with other stakeholders towards climate action in national, regional and international processes. → Number of advocacy activities that NSDO will engage with our government and support out partners to speak with respective power holders to persuade them to take ambitious climate actions and environmental protection, including for locally led adaptation measures. → Number of advocacy radio interactive broadcasting sessions held in conjunction with partners at national and sub national levels on climate action.
